

RE: Support of SB 677

We at RideSD, a committed advocacy group for public transport in the San Diego area, write to express our unequivocal support for Senate Bill SB 677.

The provisions in SB 677, urging the LOSSAN Rail Corridor agency to take into account the effects of climate change on the rail corridor, are both timely and essential. As we face unprecedented challenges brought about by global warming, it is vital that our transportation infrastructure evolves in harmony with environmental considerations.

RideSD believes that the integration of climate change factors into the planning and development of the LOSSAN Rail Corridor will pave the way for a more sustainable and resilient transport network. By adopting a forward-looking approach, this bill ensures that our rail system is not only better equipped to handle the evolving climate but also contributes positively to our shared goal of a greener future.

We kindly request your earnest consideration and support for SB 677, a step towards fostering a more responsible and environmentally conscious public transport system. Should you need further information or wish to discuss this matter in more detail, please do not hesitate to contact us at contact@ridesd.org.

Thank you for your attention to this crucial issue. RideSD stands ready to assist in any way to see this essential legislation enacted.
